Board of Health Report.

Colebrook, N. H., Feb. 15, 1906

We, the undersigned, Health Board of the town of Colebrook, respectfully submit our third annual report. The village and town have both been remarkably free from contagious diseases during the past year. No cases of Diphtheria, Scarlet Fever, and but two cases of Typhoid Fever, have occurred within the town limits during this time. A few sporadic cases of Chicken Pox, German Measles, and true Measles have occurred, with one death from the latter disease. In this case a public funeral was not permitted. Systematic examinations have been made of the sewerage system of the village at various times, and efforts made to correct existing evils. During the past year several complaints have been made that the High School building was not properly venterlated. and upon investigation of the same, we found that there was just cause for the complaint, and the condition was remedied at small expense to the town. The public water, derived from the Lombard system, and from the Colebrook Water Co. system, have both been subjected to two bacteriological examinations during the past year, and in both cases have been found to be free from contamination. We have endeavored to attend promptly to the investigation of all complaints made to the Health Board, and to advise such measures only, as seemed to us to be necessary for the public health. In the furtherance of our wishes in this respect we have been assisted by all intelligent and well meaning citizens, and to these our thanks are due.

Respectfully Submitted,

Edwin A. Cook, M. D.,	}	Health Board
