**BOARD OF HEALTH REPORT**

---

The year 1928 was nearly devoid of infectious and contagious diseases in our Town. Only a few sporadic cases of Scarlotina were reported and these were very mild except in one or two instances.

No Diptheria, Whooping Cough, Measles or Mumps were reported, and the epidemic of Polio Myelitis did not reach as far north.

The general health conditions of the schools, both Elementary and High were far above those of preceeding years. Much improvement was shown in general sanitation via, the connecting of many residences and business places to the Town Sewer system. Which heretofore were drained into the Mohawk or in private cess-pools.

WALTER F. NOYES, M. D. Health Officer
