REPORT OF HEALTH OFFICER

The general health of the community has been very good. There were quite a few cases of chicken pox and three cases of scarlet fever reported.

There have been three cases of undulant fever in this vicinity during the past six months. Because of these cases it seemed advisable, at first, to require pasteurization of the milk supply. It was impossible to accomplish this for several reasons.

First, the State Board of Health does not require pasteurization of all milk supplies.

Second, no individual could afford to install a pasteurizing plant unless the community as a whole wanted pasteurized milk.

At present, there seems to be too large a percentage who prefer raw milk.

There have been no other milk or water borne diseases reported.

Respectfully submitted,

MERTRUDE D. NORRIS, M. D.
